

# FontBundles.net Personal License

The Fontbundles.net personal license covers our 'Lite Versions' of fonts available for free. Each font covered by this agreement will be clearly labelled 'Personal License.'

The FontBundles.net personal license covers the following activities:

- Fonts **may** be used in personal projects for yourself

The FontBundles.net personal license prohibits commercial activities, here are some examples of how fonts under the personal license should **not** be used:

- Fonts **may not** be used in commercial projects which are then sold
- Fonts **may not** be used in print material which is then sold
- Fonts **may not** be re-distributed for free or paid

The idea of the FontBundles.net personal license is to allow users to gain a free version of a premium font to be used in personal projects. For any commercial use the full version of the font must be purchased.
